

Among Us!

Among Us - Summary

Among Us was released on Android and iOS on June 2018 and gained popularity in 2020 due to many well-known gamers playing the game. It's become so popular that they planned on releasing a 2nd installment, but ultimately decided to stop the project and focus on improving the original version of the game. There have been many updates to improve how the app performs and gives players access to better customization options.

The game takes place in outer space and the crewmates need to either find the Imposter and boot them off or finish all of the tasks before the Imposter kills everyone. Before playing, you can select how many Imposters you want and you'll be put into a waiting room until there's enough players. At the beginning, the screen will tell you what your role is and you'll need to do tasks based on that. Crewmates need to complete tasks to try and win, while the Imposter needs to kill crewmates and sabotage the tasks they've already completed. If the crewmates finish their tasks or vote for the correct Imposter(s) then they win and if the Imposter kills all of the crewmates before time runs out or if the tasks aren't completed, then the Imposter wins. There are one of three maps and players can choose their preferences.

Key Functions

One of the features that seems to be one of the most popular is the option of choosing the preferred number of Imposters. While this makes the game harder for the crewmates to win, it also gives more of a challenge. Another key function of the app is the ability to choose which map you want to play on. There are three different maps that can be chosen and each one is set up a little differently. Players that have been killed can become ghosts and continue doing their tasks to try and help their crewmates win. As a ghost, players can go through walls and do the tasks the same way they would if the character was still alive.

As you play more games, you'll start unlocking more features that can be used to customize your character and you can choose to purchase premium items that aren't available to those who only play the free version. The great thing about the tasks that crewmates need to do is that it's the same ones regardless of which map you're playing on. This means you'll be able to learn how to get the tasks done quickly and easily move onto your next task to try and help push your team closer to a win. # Among Us - Review/Conclusion
